
This is one sweet 1969 Dodge Coronet R/T convertible, and being 1 of 317 makes it sweeter. Alan received his invite to the World Finals in July at the US 131 event. He had purchased the car in September of 2001 in Riverton, Wyoming, and in November, set out to test his skills. Let me tell you, he's got game! He restored the car along with the help of Doug Tigner, who handled the expert paint and body work. In July 2009, just in time for the Chrysler Classic in Martin, Michigan, the car was ready for the big debut. This was his first restoration attempt and he's extremely proud of the fact that he completed most of the work on the car and not a restoration shop.

He would like to thank Doug for all his help, Charlie for the invite, and for putting on events so we're able to share our passion for these great cars.
